

FOR IMMEDIATE RELEASE

LogmeOnce Is a “Zero-Knowledge” Technology Company

Users can protect their passwords confidently and worry free

WASHINGTON, D.C., August 18, 2014—LogmeOnce, the revolutionary new password security and management system, announces today its adherence to the “zero-knowledge” technology concept. LogmeOnce is the only company in the online security market that offers a software tool for password management, a hardware USB key with additional data storage and Dropbox file encryption.

“As a zero-knowledge technology company, LogmeOnce does not know a user’s encryption key or actual passwords,” says Kevin Shahbazi, CEO of the hardware and software password management company. “You are the only one who has absolute knowledge of your actual password and encryption key — only you can decrypt your account.”

The term “zero knowledge” stems from cryptography, where one party (a “prover”) convinces a second party (a “verifier”) that a statement is true without having to share secret information and without having that secret information leaked. Since the verifier does not have the secret information to begin with, it cannot be inadvertently shared.

The concept gives users of LogmeOnce’s services increased confidence to know that the company does not have knowledge of their actual passwords as it encrypts them and protects from would-be hackers.

About LogmeOnce:

Confidently helping consumers and organizations protect their identity, data and information with identity and access management solutions, LogmeOnce develops, markets and supports a seamless and secure Single Sign-On, Identity and Access Management productivity suite. During the past two decades, the LogmeOnce executive management team has earned a global reputation for innovative, standards-based security solutions and has captured numerous national and international industry awards. As an Independent Software Vendor (ISV), LogmeOnce’s security suite includes a wide range of products, productivity solutions, cryptographic and e-security applications. LogmeOnce markets and sells its solutions worldwide directly and through a variety of partners.
