

## **FOR IMMEDIATE RELEASE**

### **New LogMeOnce Password Management 4.0 with Secure Browser protects Identities on Apple iOS, Android, Microsoft Windows, and Mac OS**

*The premium edition is free on one device, or on multiple devices at the same time, to fully, protect your devices, passwords, and identity.*

**WASHINGTON, D.C., September 8, 2015**—LogmeOnce, the revolutionary password security and management system, unveiled today the LogmeOnce Password Management Suite 4.0, an innovative security application designed to help consumers and businesses in their efforts to protect and manage their passwords. LogMeOnce is announcing three additional “new” products that integrate nicely with LogMeOnce Password Manager version 4.0:

- Mugshot
- Secure Browser
- Password Dialer © and Generator

“The prospect of losing passwords is a constant threat and an ever-evolving risk. It is important for end users to make sure they have defensive measures that are robust and able to keep up with the changes,” says Kevin Shahbazi, CEO of LogMeOnce. “We have great news for the industry. The premium edition of LogMeOnce is free. Whether you use it on one device, or on multiple devices at the same time, take it all with you. iPhone + iPad + Android + PC + Mac, protect your devices, passwords, and identity.”

Intuitiveness reigns as version 4.0 is streamlined with minimal tabs and accelerates information share between trusted users. The biggest revamp is noticeable in our mobile edition, which has a beautiful interface, an entirely new design, and extra features, including fingerprint biometrics. In addition to “Auto Log-Out” and “Smart Menu,” other updated features are:

- Secure Password Backup & Restore
- Automatic Password Changer
- Fingerprint Biometrics
- Password Beneficiary
- Password Scorecard
- Password Storage Options

- Secure Password Sharing
- Secure Note
- Single Sign On (SSO)
- Two-Factor Authentication
- Zero-Knowledge Technology
- Productivity, Reporting
- Audit & Compliance

As a “zero-knowledge” technology company, LogmeOnce does not know a user’s encryption key or actual passwords. With LogmeOnce, you are the only one who has absolute knowledge of your actual password and encryption key — only you can decrypt your account.

**About LogmeOnce:**

Confidently helping consumers and organizations protect their identity, data and information with identity and access management solutions, LogmeOnce develops, markets and supports a seamless and secure Single Sign-On, Identity and Access Management productivity suite. During the past two decades, the LogmeOnce executive management team has earned a global reputation for innovative, standards-based security solutions and has captured numerous national and international industry awards. As an Independent Software Vendor (ISV), LogmeOnce’s security suite includes a wide range of products, productivity solutions, cryptographic and e-security applications. LogmeOnce markets and sells its solutions worldwide directly and through a variety of partners.
