

FOR IMMEDIATE RELEASE

LogMeOnce Announces Patented Emergency Password with Photo

LogMeOnce's unrivaled and patented feature provides secure access in an emergency situation

WASHINGTON, D.C., April 12, 2019—LogMeOnce, the distinctive market leader in passwordless authentication, unveiled today the LogMeOnce Emergency Password with Photo, an innovative, patented security application designed to help consumers and businesses to gain secure access in an emergency situation. The new feature puts family account owner in control from a remote location via a centralized dashboard and is designed to protect and manage against cyberattacks.

LogMeOnce patented Emergency Password with Photo adds a new security layer, by granting secure access to account by pushing a secure selfie photo to account owner for additional validation and approval. With LogMeOnce's unrivaled Emergency Access feature, you can see and verify the person's photo, GPS location, and metadata before granting access. It's easy for both of you — and safe. Since your access code is concealed, the trusted friend never has to know your master password.

“LogMeOnce has another patented feature to help you if you are away from your office. When you are stuck in a bind and are caught in an emergency situation while away from your home computer, you can ask a trusted friend to help you — and grant them immediate access,” says Kevin Shahbazi, CEO of LogMeOnce. “It is very user-friendly in how it works: You will receive the trusted party's request on your mobile device along with their photo and where they're located. If no webcam is available, you get a Visual OTP to validate the request. Click to approve, and they have access for up to 24 hours. You can revoke access at any time. LogMeOnce's patented technology is intelligent and offers multiple ways to protect your credentials.”

Only LogMeOnce offers a comprehensive number of login options with automatic Two-Factor Authentication (2FA). You always get the extra security layer of 2FA without the hassle of typing yet another password or SMS code, or using a hardware 2FA token. You get instant protection and instant access to your computer via your mobile device (LogMeOnce protects identities on Apple iOS, Android, Microsoft Windows, Mac OS, and Linux).

As a “zero-knowledge” technology company, LogMeOnce does not know a user’s encryption key or actual passwords. With LogmeOnce, *you* are the only one who has absolute knowledge of your actual password and encryption key—only you can decrypt your account.

Interested parties are welcome to take advantage of the LogMeOnce partner program and OEM licensing. As a “zero-knowledge” technology company, LogMeOnce does not know a user’s encryption key or actual passwords. With LogMeOnce, *you* are the only one who has absolute knowledge of your actual password and encryption key—only you can decrypt your account.

About LogMeOnce:

Founded in 2010, the award-winning LogMeOnce confidently helps consumers and businesses protect their passwords, identity, and data. LogMeOnce rose to popularity with its feature-rich password management platform, and then with its patented PhotoLogin technology that gave users the choice of logging in with a password-less selfie. LogMeOnce innovations include a wide range of products, productivity solutions, and cryptographic and e-security applications. LogMeOnce industry distinctions include over 48 additional unrivaled products such as patent-pending Password SHOCK[®], Mugshot, Scheduled Login, Account Freeze, Password Dialer, Kill-Pill, Anti-Theft, and Live Password Tracker. Additionally, LogMeOnce Drive helps to extend security and encryption to cloud storage applications such as Dropbox, iCloud, and more. As serial entrepreneurs, the LogMeOnce management team has founded and scaled up to global brand status multiple startups, with successful exits and acquisitions, such as the acquisition by security industry leaders McAfee and Intel Corp. in 2010.

LogMeOnce is headquartered in Washington, D.C., and serves the global market with an additional location in Barcelona, Spain. LogMeOnce markets and sells its solutions worldwide directly and through a variety of partners.
