

FOR IMMEDIATE RELEASE

LogMeOnce Announces Family Edition Version 6.3

LogMeOnce protects all Family members with ease of administration

WASHINGTON, D.C., August 2, 2019—LogMeOnce, the distinctive market leader in passwordless authentication, unveiled today the LogMeOnce Family edition, with an interactive and innovative user interface, to help improve productivity for all Family members . The new version 6.3 puts family administrator in control from a centralized dashboard and is designed to help all Family members protecting their passwords and security credentials, and manage against cyberattacks.

In addition to various enhancements for password management security platform, LogMeOnce Family edition includes a unique and interactive interface for ease of administration. With LogMeOnce Family edition, you get instant protection for all family members and instant access to your computer via your mobile All Family members can securely storing crucial information such as passwords, financial and bank account information, or other data such as Social Security data or passport numbers. You can then share them with family members as you need to. Family edition administrator can easily add or remove members to the account, as well as decide which passwords may be shared with a specific member.

“LogMeOnce Family edition provides advanced security for all Family members embedded with a powerful administrator role to effectively add and remove members,” says Kevin Shahbazi, CEO of LogMeOnce. “We have also made it extra attractive by adding 10GB of security storage priced \$4.99 for 6 family members.”

Only LogMeOnce offers a comprehensive number of login options with automatic Two-Factor Authentication (2FA). You always get the extra security layer of 2FA without the hassle of typing yet another password or SMS code, or using a hardware 2FA token. You get instant protection and instant access to your computer via your mobile device (LogMeOnce protects identities on Apple iOS, Android, Microsoft Windows, Mac OS, and Linux).

As a “zero-knowledge” technology company, LogMeOnce does not know a user’s encryption key or actual passwords. With LogmeOnce, *you* are the only one who has absolute knowledge of your actual password and encryption key—only you can decrypt your account.

Interested parties are welcome to take advantage of the LogMeOnce partner program and OEM licensing. As a “zero-knowledge” technology company, LogMeOnce does not know a user’s encryption key or actual passwords. With LogMeOnce, *you* are the only one who has absolute knowledge of your actual password and encryption key—only you can decrypt your account.

About LogMeOnce:

Founded in 2010, the award-winning LogMeOnce confidently helps consumers and businesses protect their passwords, identity, and data. LogMeOnce rose to popularity with its feature-rich password management platform, and then with its patented PhotoLogin technology that gave users the choice of logging in with a password-less selfie. LogMeOnce innovations include a wide range of products, productivity solutions, and cryptographic and e-security applications. LogMeOnce industry distinctions include over 48 additional unrivaled products such as patent-pending Password SHOCK[®], Mugshot, Scheduled Login, Account Freeze, Password Dialer, Kill-Pill, Anti-Theft, and Live Password Tracker. Additionally, LogMeOnce Drive helps to extend security and encryption to cloud storage applications such as Dropbox, iCloud, and more. As serial entrepreneurs, the LogMeOnce management team has founded and scaled up to global brand status multiple startups, with successful exits and acquisitions, such as the acquisition by security industry leaders McAfee and Intel Corp. in 2010.

LogMeOnce is headquartered in Washington, D.C., and serves the global market with an additional location in Barcelona, Spain. LogMeOnce markets and sells its solutions worldwide directly and through a variety of partners.
